ABUS - MADE IN GERMANY

When August Bremicker and his sons founded ABUS in 1924, they had a lot of experience with engineering and craftsmanship – as well as a very clear vision: They wanted to create products that protected human life and property. It was a far-sighted corporate goal – paired with an expectation for quality right from the start. It was the start of a continuous success story. The ABUS brand became a synonym for security world-wide.

HIGH-QUALITY MATERIALS

To be able to offer consistently high quality and security against every type of brutal and intelligent attack technique, we use the highest-quality materials at every price level. Complex hardening processes guarantee the best resistance in our materials. Our internal quality management check all materials before and during the production process to ensure every product has the high quality you demand.

THE KEY TO SUCCESS

At ABUS, we design and build the tools and machines used in the production of our products in-house. That bundles knowhow, guarantees jobs, and strengthens identification. Our own engineering and toolmaking department concentrates exclusively on the development of bicycle and motorcycle locks. This ensures that we meet the tough requirements you place on your bicycle or motorcycle lock every day.

ENSURING CONSISTENCY

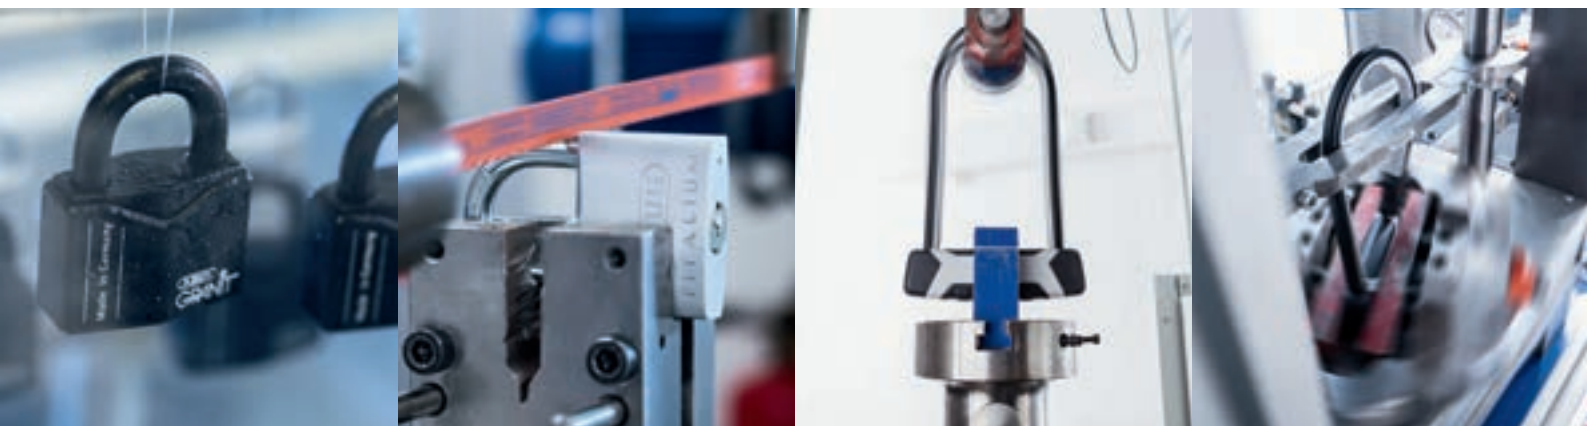

In our own ABUS test laboratory, we routinely carry out tests and attacks on our products to ensure our products offer consistently high quality.

Among others we make sure our locks are resistant to:

- Ice spray attacks and freezing conditions at -40°C
- Twisting, pulling, hammering and sawing attacks with help of our manual or machine tests
- Rust by simulating highly corrosive weather conditions

Made in Germany

APPROVALS

ABUS locks are tested and approved by independent testing institutions in a number of European countries. As every test lab use different tools, techniques and machines to test both security and quality we are very proud of the high number of different approvals given to ABUS products. If a lock can pass the varying test requirements in many different countries you can be sure it is of the highest possible quality and security.

The following seals of approval confirm the outstanding security of ABUS cycle locks:

ONE KEY™ SIMPLE . INDIVIDUAL.

HAVE CUSTOM BIKE LOCKS MADE - OPERATE EVERYTHING WITH JUST ONE KEY!

A primary lock, a frame lock, a padlock, and even a battery lock for e-bikes - if you want to secure your bike properly, you need a lot of locks. That is why we at ABUS, with the ONE KEY system, offer the ability to produce locks for your customers in such a way that they can all be operated with one key. No mess, no looking for keys.

HERE'S HOW IT WORKS

The order is conveniently placed via the Partner-Portal.

1. Read key code from code card

2. Choose suitable products at your retailer

HOW ONE KEY™ WORKS

It's quite simple. Each ABUS lock has an individual key code with which spare keys or matching "keyed alike" locks can be made - even years after purchase. All that matters is that the locks from ABUS have the same type of cylinder installed.

3. 1 week to manufacture your custom product

4. Pick up at retailer or ship to home

FAMILIAR FACE – NEW DESIGN

As a manufacturer of cylinders and bicycle locks, ABUS has the unique opportunity in the market to manufacture custom locks so that they can all be operated with one key – or “keyed alike”. It is important that the locks be compatible with each other for this purpose.

So far we have marked our products and campaigns with these icons:

With YourPlus™, we have combined all locks that have a Plus cylinder.

This icon currently indicates that this lock can be keyed alike.

FROM NOW ON, WE'RE BRINGING EVERYTHING TOGETHER UNDER ONE KEY™ – A CLEAR PROMISE FOR MORE CONVENIENCE.

THE ABUS LEVEL SYSTEM

Finding the right lock for your customer requires a few questions that can help in the selection process. A lock must not only be secure, it must also suit the user.

The questions below can help you figure out what your customer is looking for:

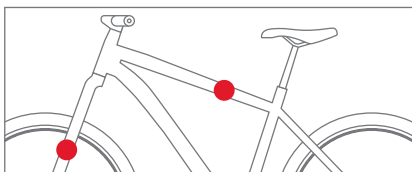

In the sales conversation, you get the best feel for your customer and a sense for what they value.

Many questions are rather soft factors and have an influence on the choice of the lock, but not so much on the choice of the appropriate security level.

The most important factors in determining the level of protection required are the bicycle value, location and length of time the bike is left.

For this, we recommend the following reference:

	Rural region	Suburban	Urban
			
Quickstop	2 - 4	7 - 10	13 - 15
Few hours	5 - 6	10 - 13	13 - 15
All day	6 - 7	13 - 15	15
Overnight	7 - 10	15	15

Lock your bike in illuminated and well frequented areas.

Secure you bike to an immovable object and lock both, frame and front wheel.

Keep the lock as high as possible and pass it through the frame as much as you can. This makes it harder to attack.

FEATURES

Bracket SH 5800K/80

TECHNICAL DATA

- Compact design: mini format with a small package size and up to 80 cm locking circumference – ideal for light weight and flexibility in everyday cycling
- Special steel construction: 2.5 mm thick bars and mechanism made of hardened steel – for greater resistance to break-open attempts
- 360° lock body: rotating lock body enables flexible alignment when locking up the bike – convenient handling in any position
- Special rivets: robust connecting elements increase the stability of each folding lock joint and strengthen the overall construction
- Automatic locking: the lock locks automatically when the end piece is inserted – convenient locking without additional locking process and key
- SH bracket included: convenient mounting using a fixing strap and 3 mm Allen key – removal at the front for quick access with little space required on the frame
- Paint protection: plastic coating of the steel bars reliably protects the bike frame from scratches
- Made in Germany: developed, manufactured and produced in Germany – ABUS quality and security expertise for more than 100 years
- Tried and tested: intensive resistance tests for exposure to weather and cold

TECHNICAL DATA

- IvyTex technology: resistant Ivy plastic fibre coating – particularly functional, weatherproof, flexible and durable
- Square chain: 7 mm thick hardened steel chain
- High-quality anti-picking cylinder: classic ABUS lock cylinder for convenient operation with familiar key principle – two keys are included in the scope of delivery for unlocking
- Automatic locking: locks automatically and without key – simply insert the locking bolt into the lock body, no key is required for locking
- 360° bolt: round steel bolt engages reliably from any position – for greater convenience when locking up the bike, even in the dark
- Solid theft protection: offers good protection with ABUS security level 8 for medium theft risk and is recommended for securing good bikes
- Tried and tested: the lock has been intensively tested for resistance to typical attempts to break it open – using tools such as bolt cutters, hammers or pliers
- Gentle on paintwork: resistant textile coating reliably protects the bike frame from scratches and damage to paintwork when locking up the bike and during transport

TECHNOLOGY

- Without PFAS additives (perfluorinated and polyfluorinated alkyl substances) and fluorine-free: measured as organic fluorine using combustion ion chromatography; measured concentration below 1 ppm
- Extremely long shelf life: up to 10 years after date of manufacture
- Quickly ready for use: extinguisher agent jet is triggered by pressing down the spray head, similar to a spray can
- Spray range: up to 3 m spray range (max. distance between source of fire and user)
- Spray time: approx. 25 seconds
- Made in Germany
- Practical holder: optionally available for secure mounting within easy reach
- Use: suitable for fighting incipient fires of fire classes 5A and 5F
- Fire class 5A: solid and non-melting materials (wood, paper, textiles); an incipient fire on a wood pile with dimensions of approx. 54x50x50 cm (HxDxW) serves as reference
- Fire class 5F: Cooking fats and cooking oils; suitable for extinguishing grease fires (approx. 5 litres of cooking oil serve as reference)
- Ambient temperature for use: functional from 5° Celsius indoors and outdoors
- Use with electrical systems: only up to 1,000 volts (min. distance 1 m)
- Compact and easy to use: the fire extinguisher spray is used like a standard spray can
- Important note: the information on the product label must always be followed

Allow us to take advantage of mutual synergy and implement it to our shared success!

Our OEM team looks forward to hearing from you at: oem@abus.de

As a globally experienced specialist in bicycle security, we offer you the best possible support and a high level of reliability. For years, ABUS has been a synonym for security, and has earned a leading position in the bicycle accessory market.

We hope to continue our good cooperation with leading bicycle manufacturers!

Quality „Made in Germany“ and „Just in time“ deliveries: concentrating on these core competences has made us an important partner for many bicycle manufacturers worldwide. We are also a strong partner on the OEM market, offering a wide selection of frame locks, integrated security solutions, and many individualized products. Among others, we offer keyed alike locks and battery cylinders for e-bikes.

CUSTOM SECURITY

Custom security solutions are not just a trend, but also a very convenient way for cyclists to secure their beloved bicycles. Take advantage of our more than 100 years of experience, and set yourself apart from the masses with a customized security solution.

ABUS HELMET DESIGN

Made in Italy

Whether road, gravel, or trail: with our “Made in Italy” helmet portfolio, the journey becomes the destination. Since 2016, the ABUS road helmets GameChanger, AirBreaker, StormChaser, and PowerDome, as well as the gravel helmet Taipan, have been produced under the Italian sun, an hour’s drive from Venice.

In November 2025, the “Targon” became the first MTB helmet to be produced in Italy. All models combine ABUS engineering expertise and the highest safety standards with “dolce vita” and top athletic performance. A fusion as fascinating as Italy itself.

TECHNICAL DATA

- Visor shapes: available in Wide, Narrow and Cut versions – tailored to different time trial positions and individual aerodynamic set-ups in TT and tri use
- Development goal: aerodynamic fine-tuning to the riding position without compromising visibility, cooling or set-up integration
- Marginal gains: minimal, measurable reduction in air resistance possible – depending on rider position, head position and crosswind conditions
- Visor tints: Narrow and Wide each available in clear, tinted or mirrored – Cut Visor available in clear or mirrored
- Magnet attachment: visor can be quickly and securely attached to or removed from the helmet thanks to magnetic mounts
- Clear all-round vision: large visor geometry enables a clear view in all directions – regardless of head position or riding position
- Seamless helmet integration: visor fits flush with the helmet shape and reduces the penetration of wind, rain, dust and insects
- Flexible use: visor is not permanently fitted and can be attached, removed, replaced or retrofitted at any time
- Robust material: made of durable polycarbonate for high stability and low weight
- Fog-free: less fogging of the visor for clear vision in changing weather and competition conditions
- Made in Italy: manufactured in Italy
- Narrow visor: optimised for compact setups, narrow shoulder profiles or narrow arm positions
- Wide visor: optimised for riders with broader shoulders or a more open arm position
- Cut visor: developed to minimise interference in very tight cockpit setups – for example, with very low head and high arm positions in time trials

SUCCESSFUL SHOP DESIGN

How you design your shop is a significant part of your economic success from a psychological perspective. We help you in the process of making your showroom a customer-friendly area. By doing so, you do not only ensure successful sales today, but also in the future. Because your customers will always come back.

1. STAND OUT

Make your business stand out from the crowd and ensure that your customers feel comfortable in your shop with a warm atmosphere.

2. QUALITY WINS

Many years of experience, carefully thought out development processes and high-quality materials are significant for the products themselves as well as for the presentation aids. ABUS has the complete package.

3. BE REMEMBERED

Create experiences, that go beyond the simple provision and sale of goods. Touch, try out - go on a discovery tour. This is your advantage especially compared to online businesses.

WE SUPPORT YOU IN SELLING OUR PRODUCTS

Your needs are very important to us. We support you in the process of creating experiences and transforming the purchase into an event, which you like to think back to - and that you want to repeat.

MODULAR CONSTRUCTION:

Our new system is designed in such a way that it can be assembled in a modular way from various elements. You can influence the design.

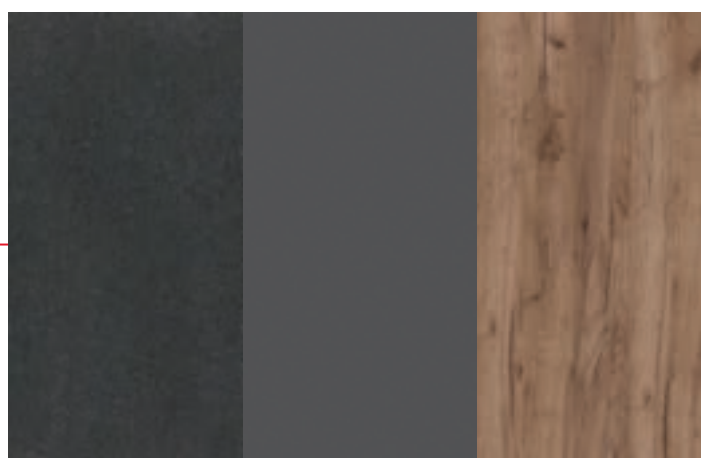

NUMEROUS ADD-ONS:

Attract attention, help to categorize and inform - combine the tools just the way you need them.

MODERN DESIGN:

Metal and wood elements combined in an understated „handmade“ look - won't disrupt the existing design of your shop.

Make full use of height and width of your walls to draw attention to the products. The combination of a solid base and stable back/rear wall ensures a secure stand.

WALL DISPLAY DIMENSIONS:

FEATURES WALL DISPLAY:

Available in 100 cm or 50 cm width, depth 35 cm

Height: 140-260 cm (variable in 40-cm-steps thanks to additional spacers)

Slatwall with option for power supply for lighting etc.

Base in wood look with interchangeable inlays

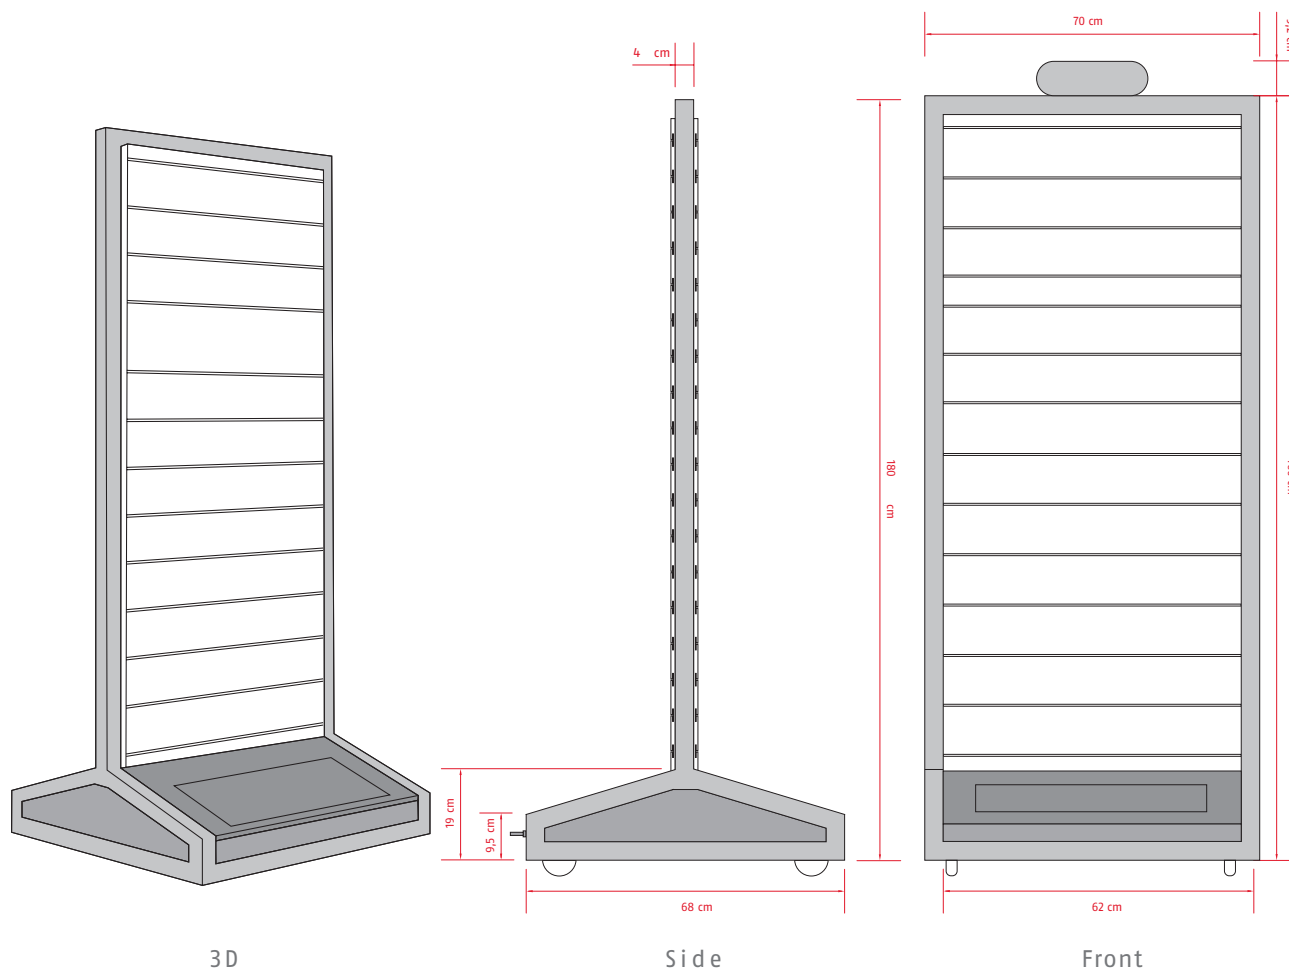

Optional with removable lid (usable as storage space)

Choose from our range of full-surface, illuminated picture elements

DIMENSIONS

FREE-STANDING

DISPLAY:

FREE STANDING DISPLAY

Expand and structure your product categories with free-standing displays - for example for new products or special offers. Thanks to the optional caster wheels you can move the display at any time to a new location.

Both sides can be used for display

Optional & removable cover, can be used for storage

Optional caster wheels make repositioning easy

BE INSPIRED

Our new product presentation system offers a wide range of possible combinations. You can choose and equip your displays to match your product range and your premises.

Very good balance of merchandising density and matching picture elements

Easy/simple orientation via category signs

Large selection of illuminated picture elements for the tension frames

Inserts with product information as a decision-making aid

Order and clarity thanks to storage space in the base
